AdhocX Vendor Rate Card PRD

Product requirements document | Version 1.0 | 25 September 2026

Purpose and scope

Build the vendor-facing zonal pricing feature for Hyderabad employee transport. Resolve the approved office hub and employee locality, show the fare before the trip is posted and preserve the booking quote for billing. The table below is the supplied launch proposal.

Audience: product, mobile, backend, operations, finance and QA. Scope covers zonal quotes, escort selection, booking, contracted prices, invoices and rate administration. Kilometre pricing, cancellation charges and multi-stop pricing need separate approved rules.

Base rate matrix

Zone	HITEC / Nanakramguda Sedan	HITEC / Nanakramguda SUV	Kokapet Sedan	Kokapet SUV
Extra (E)	₹500	₹700	₹600	₹800
Zone 6	₹600	₹900	₹700	₹900
Zone 5	₹700	₹1,000	₹800	₹1,100
Zone 4	₹800	₹1,100	₹900	₹1,200
Zone 3	₹900	₹1,200	₹1,000	₹1,300
Zone 2	₹1,000	₹1,300	₹1,100	₹1,400
Zone 1	₹1,100	₹1,400	₹1,200	₹1,500

Price basis

INR per vehicle for a standard one-way trip with one pickup and one drop. Sedan and SUV capacity must be configured from approved vehicle categories. Zonal and kilometre pricing are mutually exclusive; never add both fares.

Booking and pricing behaviour

Vendor journey

V01 Set trip details. Select pickup/drop pins, scheduled pickup time, office hub, vehicle category and employee locality. Validate passenger capacity. Identify office pickup or office drop explicitly.

V02 Quote. Resolve the approved locality and show zone, base fare, permitted escort amount, inclusions, total and quote expiry. The server returns a quote ID and rate version. Ambiguous or unlisted places require operations review before a zonal quote is offered.

V03 Post. Vendor confirms the displayed quote and posts the trip. Store a snapshot of fare, localities, hub, endpoint pins and versions. Expired quotes require a refreshed quote and confirmation. Duplicate submissions must not create duplicate trips.

V04 Assign. Driver acceptance assigns the trip; no second vendor confirmation is required. Notify the vendor and show trip status. A change to route, vehicle or escort after posting requires a revised quote and vendor agreement.

V05 Bill. On verified completion, create one billable trip entry. Show fare and approved adjustments in trip history and invoice details. Invoice settlement and driver earnings are separate records.

Fare calculation and caps

Vendor total = quoted standard-trip fare + explicitly selected, defined escort service. Under the supplied proposal, the matrix is the maximum standard-trip collection. A contracted lower fare may be stored as a separate approved vendor override; it must not increase the standard-trip ceiling.

Do not add platform, gateway, surge or pickup-distance fees above the standard-trip cap. The supplied document leaves tax and toll treatment unresolved and says to absorb applicable standard-trip costs within the cap until inclusions are confirmed. Preserve this rule; do not invent a tax rate or bill tolls again.

A vendor discount or negotiated fare changes vendor billing only. The accepted driver quote stays fixed. Track any difference internally; never expose driver payout or margin in vendor responses.

Localities and additional services

Locality and hub resolution

Use stable locality IDs, zone IDs and office hub IDs. The office hub choices are HITEC / Nanakramguda and Kokapet. A locality such as Nanakramguda may also be an employee endpoint; its presence in the guide must not silently select the office hub.

Proposed routing rule: identify one configured office endpoint and use the other endpoint as the employee locality. Support office pickup and office drop directions. If both or neither endpoints match an approved office hub, require operations review; do not infer the hub from a text label alone.

Use an approved boundary or a manually verified locality-to-pin mapping. Do not classify by nearest locality, radial distance, substring matching or whichever zone is cheaper. Overlapping boundaries and pins outside the selected locality enter review.

Kondapur city and Kondapur outskirts must have distinct IDs and visible area labels. Keep the outskirts record inactive until its pin or boundary is approved. Keep Cheriyal / Cheeriyala and Madinaguda / Madannaguda separate until reviewed. A starred record cannot produce an automatic quote.

Alias search may recognise spelling variants, but each result resolves to one approved record. Nexampuri redirects to Neknampur; Manaikonda redirects to Manikonda. Osmig and Old MIG are excluded from this master and must not be offered as bookable choices.

Escort surcharge ceilings

Zones	HITEC Sedan	HITEC SUV	Kokapet Sedan	Kokapet SUV
E / 6	₹200	₹300	₹300	₹400
5 / 4	₹300	₹400	₹300	₹400
3 / 2 / 1	₹400	₹500	₹400	₹500

Escort selection

Apply an escort amount only when an explicitly defined service is selected. Confirm whether the service is an escort person, escort transport or a return leg, and identify who supplies it. Until this is configured, disable automatic escort booking. The listed amounts are ceilings, not automatic fees.

Data and operating controls

Object	Required fields
Rate version	rate_card_id, audience, version, draft/active/retired, effective_from, currency INR
Rate row	hub_id, zone_id, vehicle_category, base_amount_paise; exactly 28 unique rows
Locality version	locality_id, display_name, aliases, zone_id, boundary or verified pin, review_status, version
Quote snapshot	quote_id, expiry, trip_id, direction, endpoint pins, hub, locality, zone, vehicle, rate versions, line items, total
Audit event	actor, event time, reason, previous value, new value, quote/trip correlation ID
Vendor billing	vendor_id, contracted rate reference, trip charges, invoice period, invoice ID, receipt allocations, balance

Administration and controls

Proposed permissions: operations verifies pins and localities; an authorised pricing admin edits draft rates; an authorised approver publishes versions; finance manages settlement or invoices. Drivers and vendors cannot change zone assignments or price rows.

Publish the vendor rate card independently with a stated effective time. Require all 28 unique price rows, non-negative integer paise values, valid hub/zone references and a complete audit reason. Do not publish incomplete versions.

An active version is immutable. Changes create a new version; completed and accepted trips retain their recorded quote. A rollback selects a prior approved version for future quotes and records an audit event.

Never trust client-supplied amounts or zone IDs as authoritative. Validate on the server. Log mismatches, manual overrides, price version changes and repeated quote failures. Restrict data access by role and vendor account.

Invoicing and collection

Support an approved vendor billing schedule and bulk receipt allocation. A receipt may settle several trip or invoice entries; record every allocation and the outstanding balance. Never invent a per-trip payment from an unallocated bulk receipt. Credit limits, invoice due dates and refund rules are configuration decisions before release.

Acceptance tests and release decisions

Test	Scenario	Expected result
V AT01	HITEC Sedan, Zone 5, no escort	Fare is ₹700.
V AT02	Kokapet SUV, Extra, approved escort selected	₹800 + ₹400 = ₹1,200 total.
V AT03	HITEC Sedan, Zone 6, escort not selected	₹600; no automatic ₹200 surcharge.
V AT04	Bachupally, Moosapet, Shamirpet	Resolve to Zones 4, 5 and 1 respectively after pin validation.
V AT05	Two Kondapur search results	Show distinct city/outskirts IDs; unverified outskirts cannot autoquote.
V AT06	Add ₹20 platform fee above the table cap	Reject standard-trip quote.
V AT07	Rate update after confirmed posting	Stored booking price remains unchanged.
V AT08	Repeated booking/completion callback	One trip and one billable entry.
V AT09	Bulk receipt covering multiple invoices	Allocated totals equal receipt; preserve remaining balances.
V AT10	Vendor requests driver earnings or another vendor invoice	Deny access or omit restricted fields.

Decisions required before production

Approve exact office hub boundaries, the outskirts Kondapur pin, and all starred locality identities. Confirm supported trip directions and the treatment of both-endpoints-in-hub routes.

Approve publication date, quote validity period, vehicle capacities, route-change handling, cancellation/no-show rules, extra-stop and waiting rules, and unsupported-location handling. Do not auto-charge or auto-pay these undefined cases.

Confirm escort definition and payee, tax/toll inclusion, finance deductions where applicable, and contract overrides, credit terms, invoice schedule and refund rules.

Release checks: all 28 matrix values match this document, locality versions match both products, role access tests pass, retries do not duplicate money movements, and operations can review uncertain pins. Track quote failures, manual zone overrides, price disputes and settlement exceptions.

Source and implementation notes

Source precedence and locality changes

Prices and original service terms come from the attached driver and vendor PDFs dated 22 September 2026. The supplied image controls locality membership; your later corrections take priority. This PRD adds proposed implementation requirements and does not mark the launch proposal as published.

Compared with the old PDF guide: Moosapet moves from Zone 6 to Zone 5; Bachupally moves from Zone 5 to Zone 4; Shamirpet moves from Zone 2 to Zone 1. Cheeriyala is restored in Zone 1, with Cheriyal retained separately in Zone 2. Kondapur outskirts is restored in Zone 1 and city Kondapur stays in Extra.

Neknampur replaces Nexampuri; Manikonda is listed once; Osmig and the prior PDF interpretation Old MIG are removed. Chellarla, Jinagar and Yammampet are restored from the image in Zone 2 with pin review flags.

Entries added in the old PDFs but absent from the controlling image are excluded as standalone records: Hussaini Alam, Mangalhat Karwan, Chaitbullupuri, Charminar, Maredpally, Milad, Rakshapuram, Ramnagar Musheerabad and Balaji Nagar. The source combined name Milad Rakshapuram remains pending review.

Duplicate source entries are collapsed within the same zone, including Ghatkesar, Nagaram, Gurramguda, Shankerpally, Patancheru and Attapur. Pratapasingaram / Pratab Singaram are represented as Pratapsingaram; Upperpally / Upparpally share one record. Source Namalgundu replaces the old PDF Nallagundu. Shahinda is retained pending confirmation rather than assuming Shalibanda.

The appendix is the shared locality master for both products. Exact pins and polygons are implementation inputs still to be approved; no geographic validation against a live map is claimed.

Suggested service responsibilities

The quote service receives authenticated account context, endpoint pins, office hub selection, vehicle category and service options. It resolves approved geography, selects the active audience-specific rate and returns a signed or server-stored quote ID with expiry and line items.

The booking/acceptance service consumes the valid quote transactionally. The completion service emits a verified trip completion event. Finance consumes that event idempotently and creates the audience-specific ledger entry. Rate editing never rewrites historic snapshots.

Proposed targets: deterministic quote results for identical inputs and versions; accessible labels for zone and area selectors; amounts stored as integer paise; timestamps stored in UTC and displayed in Asia/Kolkata. Final latency and availability targets should be agreed with engineering.

Corrected locality guide

Zone assignments follow the supplied New Adok Rate Card 2026 image and your corrections of 25 September 2026. Repeated entries are listed once. These groups are not distance rings.

*** Pin review required.** The place remains in its source zone, but its exact identity or boundary has not been verified. Both Kondapur areas are separate records. The outskirts Kondapur requires a specific map pin before activation.

Extra (E)

Gachibowli; HITEC City; Kondapur (city area); Madhapur.

Zone 6

BHEL; Borabanda; Filmnagar; Gowlidoddi; Gudimalkapur; Hafeezpet; KPHB; Langerhouse; Lingampally; Manikonda; Mehdipatnam; Nanakramguda; Narsingi; Shaikpet; Tolichowki; Yellareddyguda; Yousufguda.

Zone 5

Abids; Aghapura; Ameenpur; Attapur; Bandlaguda Jagir; Begumbazar; Begumpet; Chandanagar; Chintalmet; Erragadda; Gajularamaram; Gandhamguda; Godi Ki Khabeer*; Gopanpally; Goshamahal; Himayatnagar; Hydershakot; IDA Bollaram; Ibrahimbagh; Jagadgirigutta; Jambagh; Jiyaguda; Karwan; Khairatabad; Kishanbagh; Kismatpur; Koti; Kukatpally; Madinaguda; Miyapur; Moosapet; Nallagandla; Nampally; Neknampur; Nizampet; Pebel City*; Pragati Nagar; Prakash Nagar; Punjagutta; Puranapool; RC Puram; Rajendra Nagar; Rasoolpura; SR Nagar; Tellapur; Upperpally.

Zone 4

Afzal Gunj; Aliyabad; Amberpet; Bachupally; Beeramguda; Bholakpur; Bowenpally; Bowrampet; Chaderghat; Chaitanya Puri; Chanchalguda; Chatrinaka; Dabeerpura; Dilsukhnagar; East Maredpally; Gandhinagar; Golnaka; Gowliguda; Gowlipura; Jahanuma; Jeedimetla; Kachiguda; Kavadiguda; Kharkhana; Kishtareddypet; Kollur; Krishna Reddy Pet; Lal Darwaza; Lalaguda; Lalapet; MGBS; Madannapet; Malakpet; Mallampet; Milad Rakshapuram*; Moin Bagh; Moosarambagh; Musheerabad; Namalgundu; Nawabshaheen Kunta*; OU Campus; Padmarao Nagar; Parsigutta; Patancheru; Patelguda; Quthbullapur; RTC X Road; Ramanthapur; Ramnagar; Saidabad; Santosh Nagar; Secunderabad; Seethaphalmandi; Shahinda*; Shamsheergunj; Shapur; Suraram; Tarnaka; Tilaknagar; Tirumalgiri; Uppuguda; Vattepally; Vidyanagar; Warasiguda; West Maredpally; Yakutpura.

Corrected locality guide continued

Zone 3

AS Rao Nagar; Almasguda; Alwal; BN Reddy; Babanagar; Badangpet; Bahadurpally; Balapur; Balapur Gayathri Nagar; Balapur Malapur*; Barkas; Boduppal; Chakripuram; Chandrayangutta; Dulapally; ECIL; Gandimaisamma; Gundlapochampally; Hastinapuram; Indresham; Jalpally; Kapra; Karmanghat; Kompally; Kushaiguda; LB Nagar; Machabollaram; Madannaguda*; Malkajgiri; Mallapur; Medipally; Meerpet; Moinabad; Moulali; Nacharam; Nagole; Nagole Bandlaguda; Pahadishareef; Pardhiguda*; Peerzadiguda; Sainikpuri; Saroor Nagar; Shaheen Nagar; Shamshabad; Uppal; Vanasthalipuram.

Zone 2

Bonthapally; Chengicherla; Chellarla*; Cheriyal*; Cherlapally; Dammaiguda; Dundigal; Gagillapur; Gurramguda; Hayathnagar; Injapur; Ismail Khanguda; Isnapur; Jinagar*; Kachavani Singaram; Kandlakoya; Kareemguda; Kowkoor; Kuntloor; Nadergul; Nagaram; Narapally; Pashamylaram; Pasumamula; Pocharam; Pratapsingaram; Rampally X Road; Rudraram; Shankerpally; Thatti Annaram; Thumkunta; Yammampet*.

Zone 1

Abdullapurmet; Adibatla; Aushapur; Bongulur; Cheeriyala*; Edulabad; Ghatkesar; Gowrelly; Gummadidala; Ibrahimpatnam; Kandi; Keesara; Koheda; Kondapur (outskirts)*; Manneguda; Medchal; Muchintal; Pedda Amberpet; Pedda Golconda; Rampally Village; Sangareddy; Shamirpet; Taramatipet; Torrur; Tukkuguda; Turkapally; Turkayamjal; Yadigirpally; Yellampet.

Using this guide

Select the office hub separately from the employee locality. Use a precise pickup and drop pin for every booking. The locality determines the zone only after its identity and service boundary are confirmed.

Do not automatically choose a lower zone where names conflict. Cheriyal in Zone 2 and Cheeriyala in Zone 1 stay separate pending pin verification. Madinaguda in Zone 5 and Madannaguda in Zone 3 also stay separate. Unlisted places require operations review.
